

JAY WOODRICK SPARE PARTS

EXPERIENCE

- Lead machine builder
- Manufacturing Processor

Direct: (269)465-2512
j.woodrick@eagletechnologies.com

Dear Customer:

My name is Jay Woodrick and I am your main contact for all of your spare part needs. This includes all machines built by Eagle Technologies or anyone else in the machine tool industry. We provide quotes for not only manufactured components, but also for "purchased" components.

For machines designed and built by Eagle, it is our goal to provide you with a complete spare parts list including pricing at the time of machine delivery. This will allow you time to order spare parts for your crib prior to the start of production on the equipment. We are a "one stop" shop where we know what the latest changes to the machine were prior to shipment, therefore allowing us to provide the correct spares you need without worry or hassle.

Eagle can provide solutions for many different machine components. We have a full range of in-house machining capabilities. This capability allows us to provide quick turnaround of parts if you have a machine down and need a component right away. We also have a vast network of suppliers to draw from to cover many different areas of need.

Thank you for taking the time to read this brief introduction. I look forward to working with you in the future!

Sincerely,

Jay Woodrick
